HTML, CSS, JavaScript, TypeScript, React.js, Node.js, AWS (S3, Lambda, CloudWatch), Next.js, GitHub, GitLab, Git, Redux, React Testing Library, Jest, Material UI, Tailwind CSS, Sass, Webpack, Jira, Chrome DevTools, Visual Studio Code, GitHub Actions, ChatGPT, GitHub Co-Pilot, Gemini

Projects

Frontend Mini Challenges [🔗](#)

Open-Source | [GitHub link](#) [🔗](#)

- Built and contributed to a collection of frontend challenges implemented in **vanilla JavaScript, React, and Vue**, helping developers practice and prepare for interviews.
- Focused on clean UI, reusable components, and interactive solutions that users can try directly in the browser.

YouTube Mini Media Player

Extension [🔗](#)

Personal Project | [Github Link](#) [🔗](#)

- Developed a compact Chrome extension to enhance YouTube viewing with controls for **play/pause, seek, volume, fullscreen, playback speed, and video quality**.
- Used modern JavaScript and Chrome APIs, with AI-assisted code generation and iterative refinements to improve **UI/UX, responsiveness, and bug stability**.

Education

M.Sc. Computer Application,

Fergusson College

June 2019 – June 2021 | Pune

B.Sc. Computer Science,,

Fergusson College

June 2014 – June 2018 | Pune

Professional Experience

Senior Associate Consultant, Infosys

August 2024 – present | Pune

- Developed and enhanced **frontend and backend modules** for enterprise platforms in the automotive, insurance, and banking domains, improving workflow efficiency, data visibility, and overall user experience.
- Developed advanced filtering, data automation, and user-friendly UI components to streamline operational workflows and deliver accurate business insights.
- Integrated REST APIs and collaborated with backend teams to ensure reliable data flow and consistent user experience across modules.
- Improved application performance, resolved critical bugs, and contributed to system stability and operational efficiency.
- Used an **AI-assisted development workflow** with GitHub Copilot, ChatGPT, and Gemini to accelerate implementation, troubleshoot issues, refine UI/UX, and improve feature delivery quality.
- Developed and maintained test suites using Jest and React Testing Library, and supported CI/CD workflows to improve code quality across environments.
- Collaborated with cross-functional teams in Agile sprints, contributing to feature development, code reviews, and sprint planning.

Frontend Developer, BrewApps

June 2022 – July 2024 | Pune

- Built a dynamic test platform enabling recruiters to generate role-based assessments with **AI-assisted automation**.
- Developed real-time test interfaces with **audio transcription and AI-based candidate scoring**, improving evaluation efficiency.
- Automated result generation and reporting, reducing manual effort for recruiters.
- Improved page load performance by **~15%** through code splitting, optimization, and efficient state management.
- Mentored junior developers, conducted code reviews, and enforced best practices for scalable frontend architecture.
- Worked closely with product and backend teams in Agile cycles to deliver high-quality features.

Associate Software Engineer, TechNative Consultancy Services Pvt Ltd

June 2021 – June 2022 | Pune

- Developed responsive UI components for a **Dealership Management System**, improving usability across devices.
- Integrated APIs and collaborated with backend teams to implement core business features.
- Resolved bugs and enhanced system stability, contributing to smoother user operations.

Web Developer Intern, *Code Gurukul Tech Pvt Ltd*

December 2020 – June 2021 | Pune

- Built an interactive educational game using Google Blockly to teach programming concepts to children, designing a user-friendly UI to improve engagement and learning.
